## NAME

ares_destroy_options − Destroy options initialized with ares_save_options

## SYNOPSIS

**#include <ares.h>**

**void ares_destroy_options(struct ares_options \****options**)**

## DESCRIPTION

The **ares_destroy_options(3)** function destroys the options struct identified by Ioptions**, freeing all memory allocated by ares_save_options(3).**

## SEE ALSO

**ares_save_options**(3), **ares_init_options**(3)
